#### Feeding Directions:

This feed is designed to be fed as a supplement to free-choice pasture and/or long stem quality hay. It should not be fed as the sole ration. Introduce this and all new feeds slowly over a 7 to 10 day period to all species. Animals should have access to free-choice salt, clean water, and forage or free-access to pasture at all times. Feed with good quality hay. Feed at a rate of 1 to 2% of animal bodyweight per day. The amount being fed can vary depending on individual animal body condition and the amount and quality of the forage being fed.
